

Polarising Filter - Pole filter M30.5x0.5

Short description: linear polarizing filter, range 420 nm - 780 nm,
filter thread M30.5x0.5

Order number: 2-91-227

Characteristics

- for reflection suppression on reflecting objects in incident light
 - for showing material stress in transmitted light applications
 - Suitable for colour applications, as there is no change in the spectral composition of the transmitted light
 - high reproducibility due to printed scaling
 - easy to assemble thanks to the black anodized brass mount
-

Technical data

Filter type	Polarisation filter
Housing material	Filter mount: brass
Optical material	Glass
Thickness optical material	2 mm
Weight	13 g
Mounting	Screw-in socket
Filter thread	M30.5 x 0.5
